DAH-085B

BOOM-MOUNTED MULCHERS

Rings
Protective rings that limit the size of the bites and considerably reduce risks of breakage on the knife holders.

Motor
Variable displacement, axial-piston motors that minimize overheating and improve re-acceleration.

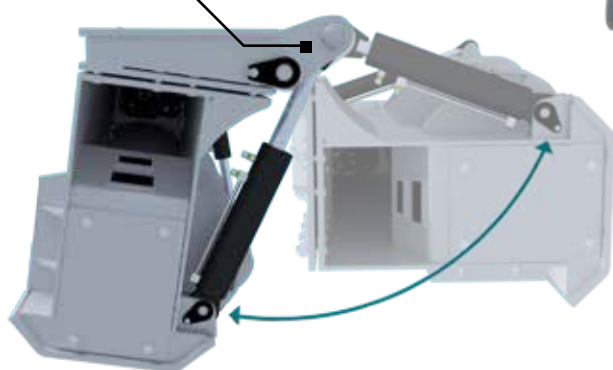

Drive
Industrial cogged belt drive system that prevents slippage and reduces effort applied to bearings compared with V-belts, for longer bearing life.

SPECIFICATIONS	DAH-085B
Excavator Size [t (lbs)]	8 - 10 (16000 - 20000)
Recommended minimum carrier power [kW (hp)]	40 (54)
Cutting width [cm (in)]	87 (34)
Cutting Distance from Ground Level [cm (in)]	2 (0.75)
Number of Blades on Rotor	15
Optimal Target Material Diameter [cm (in)]	10 (4)
Exterior Length [cm (in)]	120 (47)
Exterior Height [cm (in)]	79 (31)
Exterior Width [cm (in)]	66 (26)
Rotor Diameter [cm (in)]	35 (14)
Approximate Typical Weight [kg (lbs)]	510 (1120)

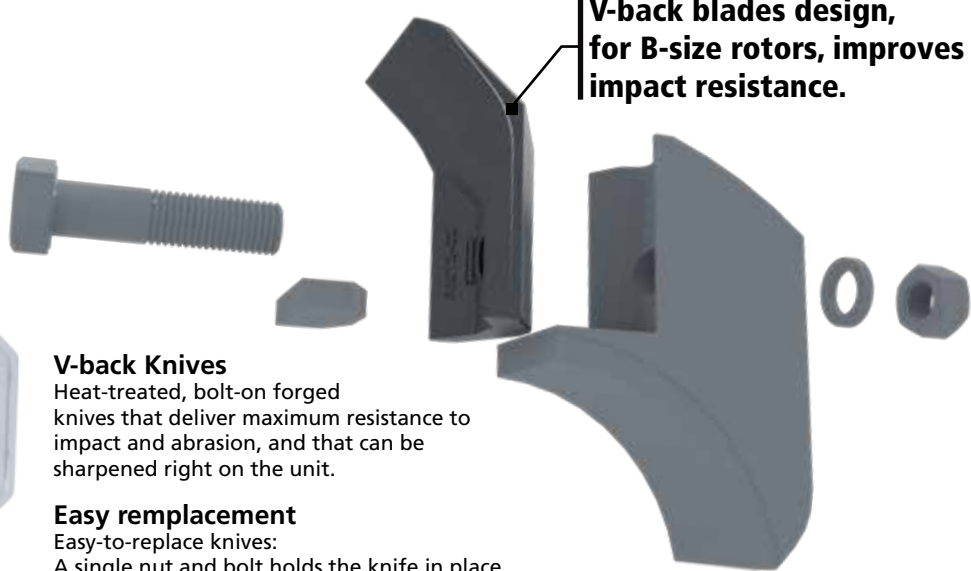

HYDRAULIC SYSTEM	DAH-085B
Variable Displacement Axial Piston Motor [cc]	60
Min. Required Continuous Flow [L/min (gal/min)]	95 (25)
Max. Operating Pressure [bar (psi)]	275 (4000)
Rotating Speed [rpm]	4000
Pressure Line I.D. [# (in)]	#10 (0.625)
Return Line I.D. [# (in)]	#10 (0.625)
Drain Line I.D. [# (in)]	#8 (0.50)

OPTIONS	DAH-085B
Type of Sharpenable Bolt-on Forged Blades	V-back
Tilt System	✓
Bolt-on wear liner	✗
Approximate Weight (All Options) [kg (lbs)]	545 (1200)

New tilt option offers higher productivity owing to increased aggressiveness.

V-back blades design, for B-size rotors, improves impact resistance.

V-back Knives
Heat-treated, bolt-on forged knives that deliver maximum resistance to impact and abrasion, and that can be sharpened right on the unit.

Easy replacement
Easy-to-replace knives:
A single nut and bolt holds the knife in place.
Replacing worn knives is a snap.
